

**Quantitative Research Analyst**

Chicago Equity Partners, LLC is a premier mid-sized investment management firm with approximately \$10 billion in assets under management. We offer a range of equity, fixed income and alternative strategies for our clients, which include public funds, Taft-Hartley plans, corporations, foundations and endowments, and sub-advisory relationships throughout the country and around the world.

Chicago Equity Partners is looking to fill a Quantitative Research Analyst position. This full-time position is located in our office in Chicago. The Analyst will work closely with the Director of Research, the CIO of Equities, as well as the Portfolio Management and Trading groups.

**Primary Responsibilities:**

The quantitative research team is responsible for the development and enhancement of proprietary alpha and risk models used in managing equity, fixed income, and alternative strategies. Specific duties include, formulating and evaluating alpha and risk factors, conducting portfolio back tests, analyzing return and risk attribution, and evaluating portfolio construction alternatives. Applicant should be comfortable managing multiple projects simultaneously, and presenting research findings.

**Requirements:**

- Master's degree in finance, economics, computer science, mathematics or related field of study plus
- Two years experience as a Quantitative Analyst
- Two years experience in utilizing probability distributions, regression analysis, portfolio theory and quantitative models
- Two years experience in executing research and analysis using some combination of C++/C#/JAVA/SQL/HTML/R expertise required.
